Shannon Hulett, DNP, RN, CNL
David Boyd, DNP, RN, CNS, RN-BC

A national, multiorganizational effort to
address this issue

AGENDA

- Review concepts and information from Track C Documentation Burden sessions
- Review of Nursing Knowledge Big Data Science specifically Transforming Documentation Work Group and active Admission Task Force
- Brainstorm what is needed in a burden reduction toolkit.

REVIEW OF TRACK C AND INPUT FROM YOU

- What did you hear over these sessions that resonate with what you are experiencing?
- What are you doing in your organization in regards to documentation burden?
- If you are working on reducing burden, which providers are you targeting and what documentation in your focus.

NKBDS GOAL

Guide consistent documentation and data collection to support sharable and comparable nurse sensitive data to improve health and healthcare.

NKBDS CORE MISSION

To develop a roadmap for achieving sharable and comparable nurse-sensitive data and to ensure the timely adoption of big data methodologies across all of nursing's domains.

WG ACTIVITIES

- **Led 2018 NKBD Pre-conference**
Streamlining & Transforming Documentation
- **Supported HIMSS Nursing Informatics Committee discussion of documentation burden**
- **Ongoing participation in ANA/ONC Documentation Burden Task Force spin-offs**
Developed draft Documentation Burden Domain Framework publication under the leadership of Dr. Patty Sengstack
Collaborating customization guiding principles best practice identification

WORK GROUPS

- Care Coordination
- Clinical Data Analytics
- Context of Care
- Education
- Encoding/Modeling
- Engage Nurses in Health IT Policy
- E-Repository
- Mobile Health Data
- Nursing Value
- Social Behavioral Determinants of Health
- Transform Documentation

WG ACTIVITIES

- **2018 Epic User Group Meeting: David Boyd & Kay Lytle**
NKDBS Update
- **Co-chairing Admission History and Current State Screening Cross-WG Task Force**
June 2019 Pre-conference – Standardizing the Nursing Admission History and Screening to Reduce Documentation Burden
- **2019 Summer Institute in Nursing Informatics**
EHR Remodeling: Gundersen Health System's Nursing Journey
Work Group Facilitation: What is needed in a burden reduction toolkit to move forward?

NKBD - TRANSFORM DOCUMENTATION WG 2019

Co-chairs: David Boyd, DNP, RN, CNS, BC & Shannon Hulett, DNP, RN, CNL

- Explore ways to decrease the documentation burden and serve up information in the electronic health record at the right time in the workflow to support evidence-based and personalized care.
- Elevate purpose-driven, role-based, patient-centric, evidence informed documentation transformation to capture nurse observations and interventions and drive purposeful secondary-use and precision nursing.
- Transformation supports enhanced data utilization to drive and measure improvement in patient outcomes and illuminate nursing's value and contribution in healthcare.

ADMISSION HISTORY & CURRENT STATE SCREENING

LEADS: JANE ENGLEBRIGHT, DAVID BOYD, SHANNON HULETT

- The Admission History Cross-WG Task Force is charged with defining a model for Nursing Admission History for the adult patient admitted to an acute care facility for medical/surgical care. The focus is on the 'what' and future work will focus on the 'how.'
- The outputs will provide the foundation for continued work in defining Nursing Admission History for other patient populations and care settings.

The Task Force is composed of volunteers/representatives from five NKDBS Work Groups:

- Transforming Documentation
- Care Coordination
- Social Determinants of Health
- Clinical Data Analytics
- Encoding/Modeling

JUNE 2019

Preconference Track 3

Standardizing the Nursing Admission History and Screening to Reduce Documentation Burden.

This track will focus on advancing the work of the Admission History & Initial Screening Task Force. Participants will divide into groups to critically review elements of the model Admission History content using a set of Guiding Principles and best practices. The output of the pre-conference will be used by the Task Force as they complete the model and hand it over to the next Work Group for coding. The purpose is to collect input on the Admission History Task Force from a diverse group of stakeholders. To achieve that, the Track has 3 main objectives: 1) Review Admission History Task Force Charter and progress to date, 2) Critically examine Guiding Principles, and 3) Review and refine content for six components of Admission History and Screening.

DOCUMENTATION BURDEN TOOLKIT

- Given all of these activities and the siloed efforts that are occurring outside of the NKBDISI:
- Do you think a toolkit is needed?
- Would a toolkit be helpful for you in your efforts?
- What would you want in toolkit?

QUESTIONS OR COMMENTS?

- We welcome your input.
- We encourage you to join the efforts.
