

Thread Detail Page Updates

1) New “**Mark as Read**” indicator.

2) In the Discussion Board, click on the thread link.

Date	Thread	Author	Status	Unread Posts	Total Posts
AM	Thread Creation	 David Lowing	Published	2	3

3) The icon is **blue** when the post is **unread** and **white** when it **has been read**.

Posts are **marked as read as you scroll down the page, after a slight delay**. Only posts that are viewed on-screen and expanded are marked as read, so **posts are not automatically marked read by quickly scrolling down the page**.

You can manually change the status of a message by clicking the Mark as Read icon.
